SabiProfile

October 2026

Introduction

SabiProfile fundamentally transforms how cross-border identity and qualifications are verified.

Traditional systems rely on static PDFs, forged paperwork, and high-friction manual legalization channels.

SabiProfile shifts data sovereignty back to individuals and sovereign nations by replacing static documents with programmable, tamper-proof, scoped cryptographic API keys evaluated by multi-agent AI screening pipelines verified against an immutable Base L2 blockchain ledger.

SabiProfile

October 2026

Problem Statement

The multi-billion dollar fraud crisis in cross-border mobility.

Lorem ipsum dolor sit amet

40% of consular and university admissions time is lost manually verifying bank statements, apostilles, and transcripts. 78% of enterprise resumes contain false claims, creating 3-6 month visa backlogs.

Problem 01

Centralizing raw citizen identity documents on corporate servers violates NDPC (Nigeria) and GDPR (Europe), exposing institutions to multi-million dollar data breach liabilities.

Problem 02

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Quisque molestie nisl eu sem tristique, sit amet convallis ex aliquam.

SabiProfile

October 2026

Our Innovative s

Patented three-tier sovereign architecture delivering instant mathematical verification with zero raw file centralization.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Quisque molestie nisl eu sem tristique, sit amet convallis ex aliquam.

Zero Raw Storage:
Files remain in user Google Drive/Dropbox; SabiProfile stores 0 bytes of raw PDFs.

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Sovereign Regional Nodes:
Candidate JSON partitioned locally to satisfy strict regional residency (NDPC, GDPR).

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Immutable Base L2 Verification:
SHA-256 hashes anchored on-chain for sub-800ms tamper detection.

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Discover Our Services

Immigration & Consular:
28-day funds holding audit, visa candidate discovery, and instant embassy attestation.

Academic Credentials:
University transcript notarization, degree apostilles, and international admissions.

Labour & Enterprise Screening:
Programmable scoped API keys, multi-agent AI rubric screening, and fraud-proof hiring.

Automated sovereign screening workflows across three foundational global sectors.

tristique, sit amet convallis ex aliquam.

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Size of Market

$54.2B

Global Identity Verification & Mobility TAM by 2030 (15.6% CAGR).

$14.8B

African & Global South outbound mobility, visa attestation & GovTech SAM.

Cross-border migration, international student enrollment, and remote skilled workforce hiring are growing at historic rates. Concurrently, strict data sovereignty regulations (NDPC, GDPR) are rendering centralized verification platforms legally unviable.

SabiProfile captures this market inflection point with an initial $1.2B beachhead across high-friction Commonwealth corridors.

SabiProfile

October 2026

Indirect ompetitor

- Legacy Verification Agencies (WES, VFS Global, HireRight):
  Manual 4-8 week turnarounds, $200-$400/doc fees, zero cryptographic automation.

- Cloud Storage & ATS (Workday, Google Drive, Taleo):
  Passive file repositories without on-chain tamper detection or AI evaluation.

- Generic KYC Providers (Onfido, Sumsub, Veriff):
  Selfie/ID scanners; cannot audit transcripts, 28-day funds, or work credentials.

Direct Competit

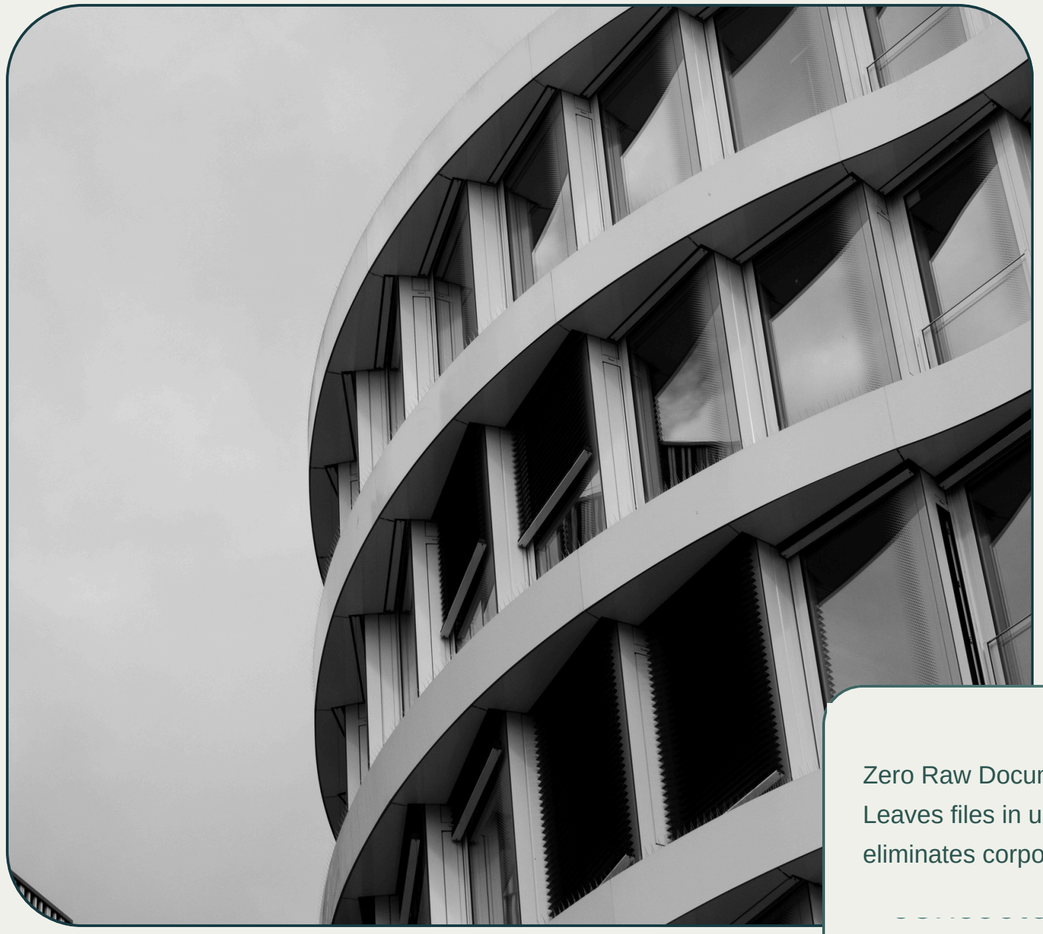
- Decentralized ID Protocols (Polygon ID, Civic, Privado ID):
  Web3-centric, lacks consular workflows, non-crypto enterprise adoption, or cloud sync.

- Centralized National Gov Portals (NIN/NIMC, DigiLocker):
  Siloed domestic honeypots without cross-border attestation or private storage.

- SabiProfile's Sovereign Moat:
  Zero raw storage + Base L2 ledger + multi-agent discovery + 90:10 GovTech split.

SabiProfile

October 2026



Key Competitive Advantages

Zero Raw Document Centralization:
Leaves files in user cloud storage via OAuth; eliminates corporate breach liability.

Autonomous Multi-Agent AI Discovery:
Sub-800ms zero-hallucination evaluation with dynamic interview probes & Base L2 proofs.

SabiProfile

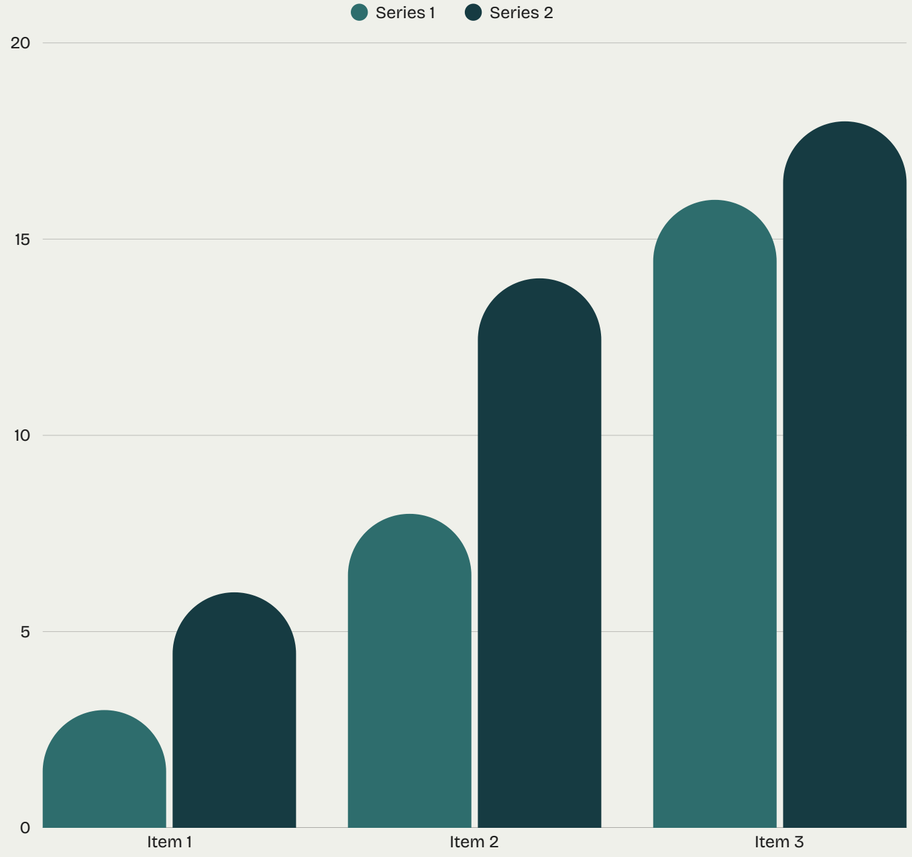
October 2026

Traction

SabiProfile has completed pre-production architecture with all core modules active and verified.

- 88 Production Next.js 14 App Router routes active
- Sub-800ms average cryptographic verification latency
- 100% automated test suite pass rate across all modules
- Base L2 Ethereum blockchain smart contracts deployed

hendrerit augue blandit, ut posuere erat aliquam.



SabiProfile

October 2026

Phase 1: 2025–2026

Core Protocol & Ledger:

- Patented three-tier storage model
- Base L2 smart contract deployment
- Multi-agent AI discovery engine
- Scoped API key minting system

Phase 2: Q1–Q2 2026

Consular & University Pilots:

- 10 institutional partner pilots
- UK & Canada immigration corridors
- Dynamic 90:10 GovTech split engine
- Transactional email dispatch system

Phase 3: 2026+

Global Sovereign Network:

- 25+ regional sovereign database nodes
- ECOWAS & EU diplomatic attestation
- Mobile sovereign citizen wallet
- Full B2B M2M API monetization

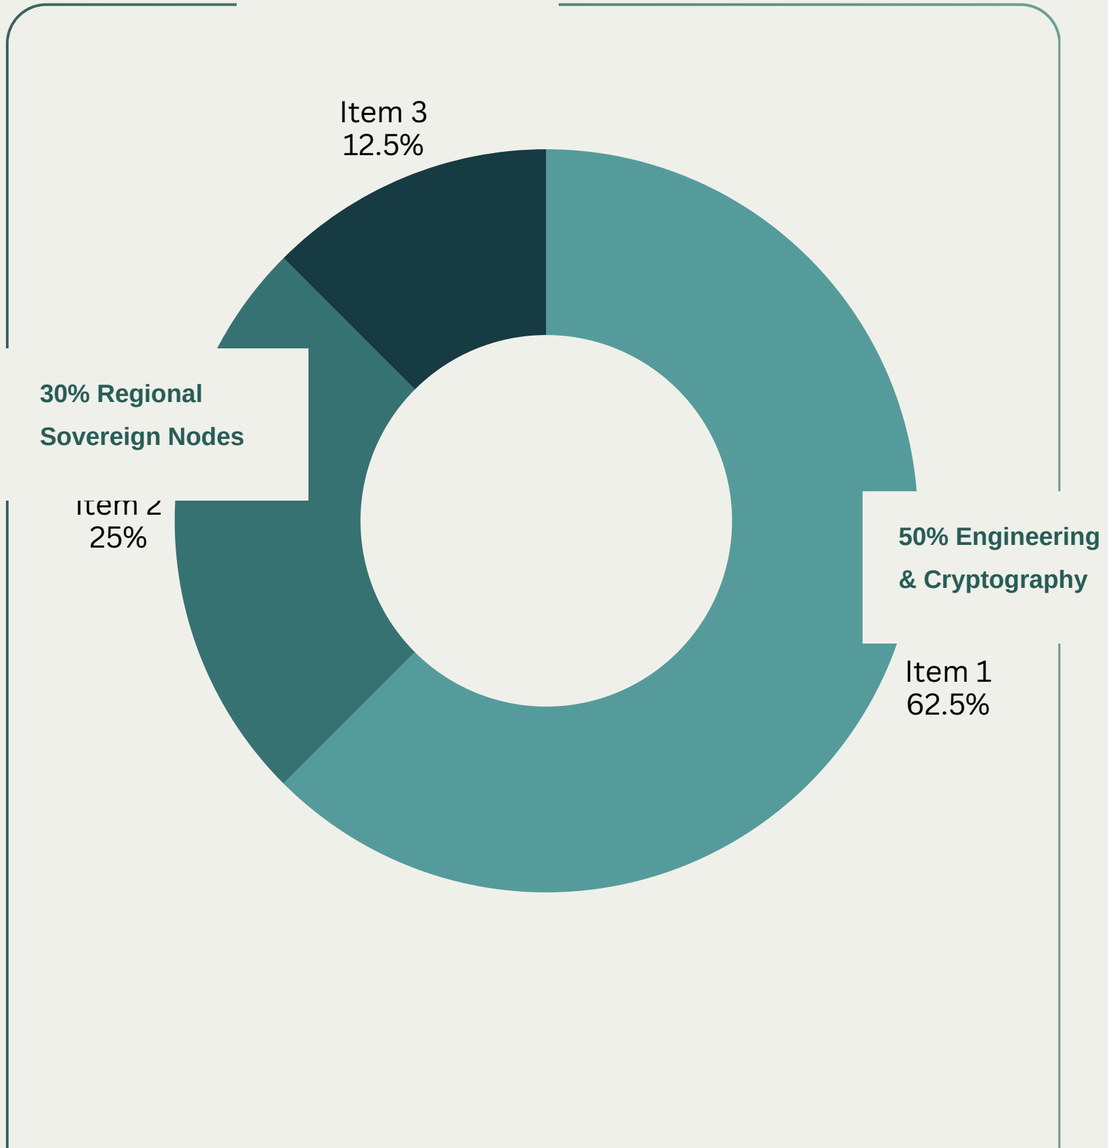
Use of Funds



Our $1,500,000 USD Seed round provides 18 months of runway to deploy 25 sovereign regional nodes, scale university and consular pilots, and secure NDPC & GDPR certifications.

Dynamic 90:10 GovTech Split Model:
$0.90 Platform Treasury / $0.10 Sovereign Node Host creates an incentivized decentralized network with high-margin recurring B2B enterprise SaaS revenue ($199 - $799/mo).

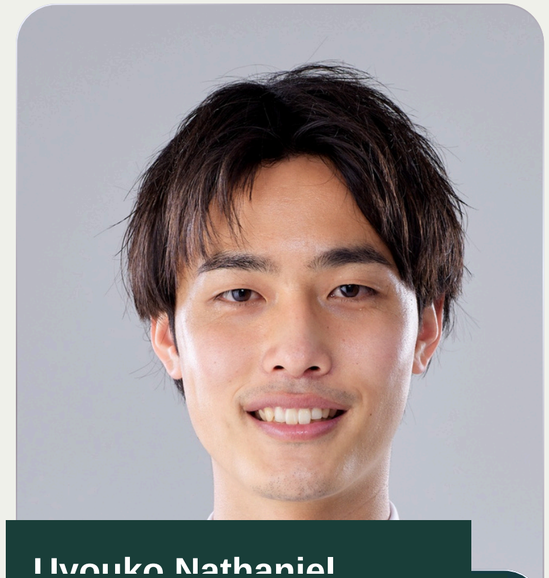
Our Team

Our founding team combines deep software engineering expertise with over a decade of cross-border travel, consular regulations, and international human resource leadership.



Uyouko Nathaniel Ekpo

CEO & Founder

Full-Stack Software Architect
Decentralized Identity Engineer

Bernis DOUSSOH

Head of Mobility & HR

Global Travel/Tourism Specialist
Senior International HR Lead

Sovereign Advisory Board

GovTech & Consular

Diplomatic Attestation Experts
Regional Node Governance
